Assistant Commissioner:

In the Office Action mailed May 11, 2007 the Examiner stated that Applicant had set forth claims that contained two patentably distinct inventions:

Invention I drawn to claims 1-5, drawn to a process for fabricating a whole solid-state pH sensing device by using polypyrrole as the contrast pH detector, classified in class 205, subclass 188 and;

Invention II, claims 6-8, drawn to a process for fabricating a whole solid-state pH sensing device by using the polypyrrole as the contract pH detector, classified in class 205, subclass 118.

In response to the written restriction requirement of May 11, 2007, Applicant hereby elects Invention I drawn to claims 1-5 in an effort to advance prosecution in the present application.

Examiner further asks for a listing of all claims readable on the chosen species, including any claims subsequently added. In conformance therewith, Applicant
